Good night, my love-good night. New York, May, 1825. PASQUIN.

I said I would love thee in want or in wealth, In cloud or in sunshine, in sickness or health! And fear not, my love, when thy spirits are weak, The troth I have plighted I never will break : Oh! say not our hopes are all fading away, They but sink like the sun-at the close of the

To rise with new brilliance, and 'lighten our skies, When Time shall have bound us, by perishless ties!

Didst thou betray me to the fiend despair! knew ye not, nor did I wish to know,-I sought for none but heavenly friendship's ties, When thou didst laugh in Delia's sparkling eyes, And thence into my breast thy darts didst throw.

I felt them sticking there, and twice or more. Despite of thee, I twisted them about, But ah! the more I tried to get them out, I found by trial, worse it made the sore.

FOR THE SATURDAY EVENING POST. I saw man stretched on the bier, cut down in the prime of his days, like a flower before the scythe of the mower, and like it laid on the bosom of the cold earth, to moulder away and return to dust. I looked around the place of his former habitation—there stood the seat he was wont to occupy - here were the books he had often read-every thing remained as when he was sole master, and directed according to his own will and taste-but yet there reigned throughout a melancholy silence; a gloom seemed spread over the scenes, within and without his late cheerful home-the smile of welcome had vanished from the countenances of his family-the stillness of death was broken only by the involuntary burst of gricf, and tears flowed copiously over the ruins of blighted hope, and the desolation of fond affections, like the rains of autumn on the dreary and scathed harvest field. When I left the house of mourning I looked at the bright and beautiful source of life and lighthis splendour was not diminished-the fields still retained their verdure-the flowers their gay colouring and rich perfume-the stream flowed on in its accustomed channel-the birds still chaunted their melodious songsnature, thought I, is unchanged; but to the departed spirit, what are they; he hears not the melody, beholds not the beauty, nor inhales the fragrance of elementary things-all with him is new, and unchanging -the brightness of our skies is no more remembered in the dazzling glories of the eternal world, than the rays of the most brilliant star are perceivable in the beams of the morning sun-wherefore then should the transient things of time occupy so much of our attention here, seeing that hereafter they are forgotten? "Lord teach us to number our days, and apply our hearts unto wisdom. Let us seek thee early, and lay aside all pride and vainglorying-not trusting in our own strength."

A SCENE IN AFRICA. I stood on Cape Montserado-night had spread over it her shadows-silence reigned, broken only by the sound of the distant, dashing waters. As the bright and beautiful conland .- Here, every day for centuries, has the human body been bound in chains, the ties of kind fellowship, of nature's strongest affections, ruthlessly sundered, and hope, which smiles in death, made to perish by living agony. Here has manly courage been subdued by torture-parental love punished as a crime, and female tenderness been rewarded by the keenest sufferings. If the pure spirits which inhabit you, can look upon human affairs, must they not suppose that knowledge and civilization harden the heart, and that sympathy lives only in the breast of barbarians. Rejoice they must, that the fair planets roll so far above the unholy and contagious influences of our world. What multitudes of human beings on this shore, have been immolated on the altars of avarice-how many have wished to die, as they bade a final farewell to their lovely homes, and saw our the last time, their wives, children, and friends! My God who can describe the miseries of those crowded to death in the dungeons of a slave ship ! But shall everlasting night cover this land, and the records of African history forever contain nothing but mourning, lamentation, and woe? Heaven forbid it. The Omnipotent will not suffer it. A universe beautiful, harmonious and grand, arose at his word from chaos; from the ruins of human virtue and hope, his wisdom is displaying a new moral creation, and the exile, sufferings, and degradation of the Africans, may be succeeded by their return, felicity and honor.

A female Friend, who has much at heart the reputation, as well as improvement of every person attending our religious assemblies, has for some time past, been desirous of submitting to the young men of the different meetings, a few calm observations, relative to a custom, which she deems worthy to engage your serious attention. She alludes to the practice of arranging yourselves on the side of the street, and making observations on the different young women, who coming out of meeting, are compelled to pass in review before you. Besides the highly improper tendency of such an act of levity, on an occasion when the mind has been or ought to have been but a few minutes before, engaged in the most serious and sacred of all its duties, there are even inferior considerations, which it is believed, need only be brought before the minds of many who have been drawn into the error to convince them of its extreme indecorum, and therefore to induce an abandonment of the custom. Few who are observed in this practice, would be willing to have themselves

ESSAY-No. 3. What a fine acquirement, how productive of good, and how replete with excellence and importance to man is education. It is one of the brightest ornaments which can gild his passage through this world, or which can make him appear to any advantage in it. It places within his reach, all those comforts and pleasures which, as man, he can possibly enjoy, and affords him an opportunity of dissipating the clouds of ignorance, and thereby contribute to the welfare of his fellow beings .-Education leads man from the path of ignorance into that of knowledge, guides his reason and understanding, restrains and acts as a rein to his passions, by keeping them withal due and proper bounds. It teaches him to contemn and despise the meanness of the ignorant -to look down with indignation upon their presumption and self-sufficiency—to treat with cool indifference the low and sordid motives by which they are generally actuated, and which characterize their every action. Education is an acquisition far more valuable than riches.-The man of wealth, is liable through the vicissitudes and changes of fortune, to lose it, and regarded, or represented, as unpolished, in-delicate, or disrespectful to the young women dowed with, and possesses education, will

OPPOSITE MANNERS AND CUSTOMS. The common drinks of the Japanese are hot; ours are cold. They uncover their feet out of respect; we the head. They are fond of black teeth; we of white. They mount their horses on the right side: we on the left. Among the Chinese, white is the colour for mourning; a son has no right to wear white clothes while his father and mother live; but he can wear no other for three years after their death. With us, black is the colour for mourning. The Chinese use their boots for pockets, putting into them their fans, papers, &c.; the boots are made very wide, and of black satin leather: we use our coats, &c.— The dress of the women of the lower classes in China, is the same as, or differs but little are more dissimilar. The Chinese for beauty reduce both eyebrows to one arched line; we let them alone to form two arched lines, and delight in the 'graceful curve.' Long nails are with us a disgrace; with the Chinese, they are an honour. Both men and women of rank in China suffer the nails of the left hand to Guine saw a mandarin whose nails were nearly brought them to ten or twelve inches. The tles and slew the English wherever they bamboo cases. There is another peculiarity to be universal; they use their left hand in preference to the right.

with the left side towards the horse's head; and an English woman with the right.

A Portuguese wife never assumes the family name of her husband, but in all the vicissitudes of matrimony retains her own; an English family one. In Portugal, the master of the house precedes the visiter in going out; with us, the visiter precedes. The Italians reckon the commencement of

their day from sunset; we from sunrise. Their clocks strike all the hours from one to twenty four; -ours from one to twelve. The Kamtchatkadales always use dogs for the purpose of labour and travelling; we use

horses and oxen. We use wine and ardent spirits for intoxication; but the Turks opium. - We undress

going on horseback. In conclusion, I would state what an American writer says, viz: that the Spaniards may be said to sleep upon every affair of importance; the Italians to fiddle upon every thing; the French to dance upon every thing; the Germans to smoke upon every thing; the British Islanders to ent upon every thing; and the Americans to talk upon every thing.

WILLIAM WALLACE.

THE HERO OF SCOTLAND. Never, perhaps, was the fame of any man

more cherished by a people, than that of William Wallace is by the Scottish nation. His of all ranks of the people; and in those parts lay, there is scarcely a lofty rock, high fall of water, lonely cave, or other remarkable obname dear to every romantic, youthful, and patriotic mind. The recorded feats in the life of Wallace, rank him not only among the first patriots of his nation, but among the first of all who have deserved that honourable anpellation. He made his appearance in the theatre of active life, at a most interesting period. A disputed succession to the Scottish crown had been submitted to the decision of Edward the First of England. The office of umpire, gave the English king a fatal ascendancy over the Scottish nobles, and especially over the competitors for the crown. Baliol was preferred, on condition that he would acknowledge the dependence of Scotland upon the English crowe; but at last, under the mortification of repeated insults, he resigned the crown altogether into the hands of Edward, on the 3d of July, 1296. All Scotland was now overrun by an English army, and the government placed in the hands of English deputies, who made it odious to the people by their exactions and oppressions. At this critical moment was the standard of freedom first unfurled by William Wallace, the younger son of a private gentleman, Wallace of Ellerslie. To great bodily strength and activity, and a courage which delighted in danger, he united an inventiveness of enterprise. a fertility of resources, and a generous gallantfrom, that of the men; with us, no two things ry of manner, well calculated to gain him an authority over the 1 * le and undisciplined multitude who answered his patriotic call. In

May, 1297, he began to infest the English quarters, and soon made his numbers appear midable. The first person of note who joined him, was Sir William Douglas. With their united forces, these two allies attemptgrow to an extraordinary length, in order to ed to surprise Ormesby, the English Justicia-prove their gentility, and to distinguish themselves from labourers and mechanics. De precipitate flight disappointed them of their expected prey. After this, the patriotic band six inches in length, and a physician who had roved over the whole country, assaulted casnails are thus kept extremely clear and trans- met with them. Several men of the highest parent, and at night are carefully enclosed in rank now joined the standard of freedom; among others, Bruce, the steward of Scotland. of custom among the Chinese, which is said and his brother, Sir Alexander de Lindsay; Sir Andrew Murray, of Bothwell; Richard Lunden and Wishart, bishop of Glasgow .-A Porluguese woman, when she rides, sits But unfortunately, they brought more splendour than real strength to the cause.

Wallace, though the master spirit of the whole enterprize, was of two humble a rank among the gentlemen of Scotland, to be readily acknowledged by them for their chief; woman always assumes the family name of and where merit like his was not recognized her husband. The Portuguese are generally as the best title to supreme command, it is addressed by their christian name; we by our easy to conceive that the conflict of pretentions must have been endless. All the leaders claimed to be independent of each other; and to nothing, even of the most obvious adsen and numerous body of forces which had delicate, or disrespectful to the young women in the circles in which they severally move.

"Return," said Wallace, " and tell your masters, that we came not here to treat, but to assert our rights, and to set Scotland free." "He defies us!" cried the English, and impatiently demanded to be led on. The Scotch were encamped on the opposite side of the river to that occupied by the English, who, to approach them, had to defile over a long narrow bridge. As soon as the van of the English had crossed the bridge, and before they could form themselves in order of battle, Wallace rushed down, and broke them in a moment. Many thousands were slain on the field, or drowned in attempting to recross the river. A general panic instantly seized the main body of the English : they set fire to the bridge, abandoned all the baggage, and did not cease their flight till they had reached Berwick, which they also speedily evacuated. The loss of the Scots would have been inconsiderable, had they not numbered among their slain Cir Andrew Murray, the

gallant and faithful companion of Wallace. Scotland was thus once more free; but in consequence of had seasons and the disorders of war, it suffered severely from famine .-With the view of procuring sustenance to his returning followers, Wallace marched his army into the north of England; and for upwards of three weeks the whole of that wide track of country from Cockermouth and Carlisle, to the gates of Newcastle, was wasted with all the fury of revenge, license, and ra-

Wallace now assumed the title of "Guardian of Scotland, in the name of King John, Baliol,) and by the consent of the Scottish Nation." That he was virtually so, there can be no doubt; and we ought therefore to be the less scrupulous in inquiring as to the forms which attended his investure with this high dignity. With the aid and countenance of only one of the Scottish barons, the lamented Andrew Murray, and supported by the lower order of the scottish people alone, he had freed his country from English thraldom, and restored it to its ancient independence. A service so great and unexampled, gave him a claim to the appellation of Scotland's Guardian, which wanted neither form nor solemnity to make it as well founded as any title that ver existed.

The barons who had stood aleof during the truggles for liberty, now began, as before, to intermeddle with the fruits of the conquest so gloriously achieved. Of Wallace, they speedily evinced the utmost jealousy. His elevation wounded their pride; his great services were an unceasing reproach to their inactivity in the public cause. Strife and division were again introduced into the Scottish camp, at a time when more than ever, unanimity was necessary to the establishment of the national independence.

Edward had again invaded Scotland with a powerful army, and Wallace had a second time to risk a general battle for freedom. In the neighbourhood of Falkirk the hostile armies met. Wallace had now around him, a Cumming, a Stewart, a Graham, a Macduff and other names of equal note in Scottish exploits have been for ages the darling theme chieftainship; but feebler through the distrust of so many rivals, than when alone with the gallant Murray, he led his countrymen to battle; victory deserted his plame. The Scots were defeated with great slaughter: ject in nature, which is not designated by a and though for some time after they kept up the war in detached parties, they were no longer able to muster an army in the field Edward, with his victorious troops, swept the whole country, from the Tweed to the Northern Ocean; and there was scarcely any place

> Yet amid this wreck of the national liberties, Wallace despaired not. He had lived a freeman; and a freeman he resolved to die. All his endeavours to rouse his countrymen. were, however, in vain. The season of resistance was for the present past. Wallace perceived that there remained no more hope, and sought out a place of concealment, where, eluding the vengeance of Edward, he might silently lament over his country.

of importance, but owned his sway.

Nothing now remained in Scotland unconquered, but the Castle of Stirling, which was at length compelled to surrender. But Wallace still lived; and while he existed, though without forces, and without an ostensible place of residence, his countrymen were not absolutely without hope, nor Edward without fear. Every exertion was made to discover his retreat; and at length he was betraved into the hands of the English. He was brought to Westminister, arraigned there as a traitor by Edward, and as having burnt villages, stormed castles, and slaughtered many subjects of England. "I a traitor!" exchanged Wallace, indignantly. "What injury I could do to Edward, the enemy of my liege sovereign, and of my country, I have done, and I glory in it." Sentence of death was pronounced against him, and he was immediately executed, with that studied rigour in the circumstances of the punishment, which, while seeking to make impressions of terror, excite pity. His head was placed on a pinnacle at London: and his mangled limbs were distributed over the land. Thus cruelly perished a man whom Edward

could never subdue, and whose only crime was an invincible attachment for freedom and independence.

From the North American Reviews The first Settlement of Philadelphia.

It was a remark of one of the wisest and best men, whom the world has seen, that there exists in the economy and course of nature an indissoluble union between virtue and happiness, between duty and advantage, between the genuine maxims of an honest and magnanimous policy, and the solid rewards of public prosperity and felicity.' By the writer of a brief history of Philadelphia, this remark of Washington is quoted, as being fully illustrated in the rise and growth of that city. And, indeed, there are many associations connected with the origin of Philadelphia, its vantage, could their common consent be ob- progress and history, equally grateful to the tained. But the memorable interview of William Penn with the Indians, on the banks of the Defaware, exhibited a different scene; the even scales of justice, and the mild persussion of christian love, were the powerful engines with which he swayed the barbarian mind, and taught the savage to confide in the sincerity of the white man; and the first page in the annals of Philadelphia is one of the brightest in the history of mankind, recording an event not more to the credit of the wise and benevolent legislator, through whose agency it happened, than honorable to humanity it. self. CONVERSION OF THE JEWS. "The other day, (says Noah's Advocate,) we had a formal application made to us, from a beautiful pious young lady, with blue eyes, and an air of sweet meekness altogether irresistable, to give her two dollars, to present to the Society for ameliorating the condition of the Jews .- It distressed us to the heart to refuse any thing to so fair an applicant, but we could not stand an appeal so very palpable. " My dear madam, our condition is perfectly good-how can two dollars make it better? We live happily in this blessed land, God be praised, and our condition, not to be ungrateful, is as good as our neighbours." She gave us to understand that it was our eternal, not temporal condition, which she was so anxious to ameliorate; in short, the two dollars was to swell the fund created to convert the Jews to Christianity. And is money to be offered for such purposes? How! buy converts to Christianity? We admit no such sacriligious traffic. Having managed to save the two dol

lars, a promise was extorted from me to at-

tend the anniversary meeting on Friday, of

the society for converting the Jews.

"The president, managers and members were all accommodated with chairs, tables, &c. The meeting was opened with prayer, and the report was read. This report was flattering; converts had been made (principally abroad) and a farm of 400 acres in Westchester (N.Y.) had been purchased, to set them to work. Several clergymen addressed the meeting piously and benevolently; but I wanted to see and hear the converts; I desired to know the natives who had renounced the faith of their fathers. At length two made their appearance, both from Poland, sent on their travels by the London Society. One of them said he had been converted at eight years of lions. age; Dr. Johnson would have said he had been caught young. He told an unfortunate secret. which was, that the London Society, with immense funds, had accomplished nothing, and all their hopes rested on America. Without those immense funds, the encouragement here, at least, is not flattering.

"Are we treating this subject lightly? Well then, we shall be serious.

"Let the Jews alone. It has pleased the Almighty to continue them a distinct people and in the midst of captivity and oppression persecution and cruelty, for four thousand years, his providential care has been extended in bountiful kindness to his chosen peopletates. Every human law derives its origin from the Jews-to them is the moral world indebted for the foundation of morality-the knowledge of a God, of virtue, justice, and the hope of everlasting life.

"But suppose the Jews should become converts, it is likely they would be Catholics, for that is the primitive Christian faith, and withal is an imposing religion. Should they turn Catholics they will be branded as followers of the "Pope and the devil," and should they adopt the Presbyterian or Episcopalian doctrines, the Catholics will call them hereticsso that in this age of conversion, the Jews will be as unfortunate as they were in the early ages, when the Romans persecuted them as Christians, and the Christians oppressed them as Jews."

A gentleman passenger in the that place, or his intention shortly to be their duty, on occasions of great importance Coulter, states that he and Mr. Lynch had not be their duty, on occasions of great importance to the commercial community, to send express mails on their lines, at the rate of 11 miles an hour; and thus, by affording to all tired to the cabin, but Mr. Lynch soon after the news of important changes in the market, war 's went on deck alone, to enjoy the market to put a stop to the system of speculation which has lately been so extensively practised by individuals of one commercial town on those of another, who were not possessed of information. The whole credit of the intention, whether it succeeds or not, is said to be with all despatch; but as the brig was got due to the Postmaster General.

A gentleman from the interior of Georgia State, informs that the body of Indians who killed their Chief, Gen. M'Intosh, dispersed the next day without committing any further outrages than those already mentioned; and that they were in a quiet and peaceable state. They affirm it is not their intention to commit any further violence-that they are now geance on their chief, who they say, has seriously injured and deceived them. It is believed the Indians will abandon the country without a murmur, at the time stipulated by the Treaty for their departure. The attack on M'Intosh was made on the 1st inst, between 4 and 5 o'clock in the morning. On being informed of the approach of the Indians and their intention to kill him, M'Intosh immediately presented himself, and commenced harranguing them; at this moment more than fifty guns were fired at him; and twenty four balls it is said passed through his body.

The Milledgeville (Georgia) Recorder of the 10th May, says-" The Governor we understand has issued orders to the officers commanding Brigades in the new counties for the protection of the frontier against the Indian hostility, and also for insuring the personal safety of the Agent, whose life is said to be threatened by the Indians. Since our last paper information has been received of the marder of the interpreter. A number of the friendly Indians have taken refuge within the white settlements.

A person named Justin Winslow, was apprehended at Tawanda, Bradford County, (Pa.) on the 16th inst. exactly answering the description of the supposed murderer of Miss Cunningham-says he came from Easton, and was at work for Mr. John Hell near that place on the Jersey side, at the time of the mur. der, and for some days afterwards. He, however, is held till the truth of his story can be ascertained.

Resolved. That a Gold Medal of the value of Fifty dollars, be offered as a premium, to the person who shall conduct the business of a Farm in Pennsylvania, on the largest scale, for two years, without using, or suffering ardent Spirits to be used, on his property, unless the same be prescribed by a Physician. Professer Keating, at the same meeting, offered the following resolution, which was

onanimously approved, viz. Resolved, That a Silver Medul be offered as a remium to the Farmer, who previously to he first of January, 1827, shall have made in Pennsylvania the most extensive and success ful experiment on the use of Fish as a manure.

On Wednesday afternoon, the 25th instant. he four horse team belonging to Amos A. Jones, of Verreeville, loaded with Lehigh coal, returning from Philadelphia, was struck by lightning. The leading horse was killed on the spot, the rest were knocked down .-The carter being, at the time, two or three yards from the wagon, was but little injured. In the evening, about half past 7 o'clock, the sloop Catharine and Elizabeth, Isaac Fithian. Master, lying at Chesnut-st. wharf, also suffer ed by the same fluid. The mast was very much shattered, but her hull remains uninjured, the hightning passing down over the side of the vessel. The hands were fortunately in the cabin at the time, and escaped unhurt, though considerably stunned by the shock. One or two houses in Eleventh street were injured by the lightning, and a little girl considerably hurt. A colored woman was killed in Seventh street, and the axle of a gig shattered by the same flash.

" A guilty conscience who can bear ?" _ There now confined in the Jail at Salem, N. J. man named William Sayre, a shoemaker by trade, who has just confessed that 15 years ago he murdered his wife. At the time the nurder was committed he lived in Callowhill street, between Second and Third streets,-"On the night of the 14th of October, 1810." says the Salem Messenger, "his wife having been about five weeks in a state of ill health, that required attendance and broke his rest, after assisting her into bed, he choked her to death with his hands! A child of theirs, about five years old, was the only other being in the house. No one suspected but what she died a natural death. Sayre continued to reside in Philadelphia for more than a year, when he enlisted in the army, in which he continued upwards of 4 years." He has since been roving about, his conscience continually oppressed with the burden of his foul crime, till a few days past, when he met a stranger, on the road, to whom he confessed his guilt.

An insane man, named Alfred Rowe, escapd from the Asylum for insane persons it Hartford, (Conn.) a short time since, in & most surprising manner, through an upper window, the aperture of which was less than eight inches wide, and he a man of middle size. As he was considered to be restored to his health and reason, and was to have been discharged on the following day, no search was made for him-he having stated that he was coming to the State of New York. On the evening of the 15th instant, however, as we are informed by the Connecticut Mirror 1 few days afterwards, he went to the house of Mr. Goodrich, in Farmington, and so fright ened the family that they went to a house of a neighbour, Mr. Bird-he, having been used to the management of an unfortunate brother who had long been crazed, offered to go, and did go, with his wife and another man in o pany, to take care of the intruder. The two men entered the house ; Mr. Bird went first, and the other held a candle and followed after him. On opening the inner door, Mr. Bird received a blow from behind it, with a axe, on his scull; the candle was extinguished by the draught of air, and the person who had accompanied Mr. Bird, fled. After some time people ventured in, and found the body of Mr. Bird dragged near the threshhold of the ject of pursuit, fired his gun and killed him The person thus unfortunately killed, was Mr. Drayton Bodwell. Rowe has since been take en and secured in gaol.

This little volume, of which a brief notice was given last week, we have perused attentively, and have found no reason to alter the favourable opinion we then expressed. The tales are brief, and related in a simple, unaffected style, in which the author successfully enlists the attention of the reader, who will frequently find his expectations excited, and his feelings touched with no ordinary hand. There are some slight blemishes in both the language and in the conduct of some of the tales, together with occasional typographical errors, which exhibit a want of attention; shout four inches long and one deep. When but they occur so seldom, and are accompanied with such abundant and satisfactory evidence of the writer's ability for doing better, that we feel no disposition to dwell on this portion of our subject, but will content ourselves with admiring the flower, while the scrutinizing critic may amuse himself, if he pleases, by picking it to pieces.

We intended to have given a brief outline of the principal tales, accompanied with extracts; but as this might, in some measure, lessen the interest of those who mean to read the book itself, we shall at present merely make a few selections, sufficient to give a general idea of the author's manner.

The tales are confined to a retired romantic spot, of which they form, in part, the pleasing history, and which is thus described:

On the banks of a little stream, that takes its source among one of the minor ridges of the Allegheny, and empties into the Susque hanna, in the western parts of Pennsylvania. stands the little town of Somerville. It is one ere was a great excitement on the occasion, of those sweetly sequestered spots, which nature seems to have marked for the quiet retirement of those who wish to mingle but little with the world. Situated at the foot of a high sloping hill, and surrounded by solitary woodlands, it seems, at a little distance, to be literally buried in the wildness of uncultivated nature. But, on a nearer approach, the eye is delighted with the visible hand of ultivation. The beautiful simplicity of the lwelling houses—the neat little stone church, whose spire rises above the trees a short distance off-the old school house, from whose windows the little children may be seen peepng their heads at the passing stranger-and he cultivated little gardens attached to each house, all bespeak a taste and refinement which many would not expect to find in a village so very remote from the busy world.

he shade of the tall oaks on the western side of Somerville had already covered the village, and was slowly stealing still farther beyond its little boundaries. The sky was beautifully serene, and here and there a light many respects. The narrative is not well put cloud, like a streak of pure burnished rold. showed itself above the horizon. It was in it portrays are, in several instances, too rude the early part of autumn. The leaves were slightly tinged with yellow, and as they were and unbecoming for any rational purposes of rustled by a slight breeze on the higher branches, they presented the beautiful glory of the western sun, which was now setting behind the distant hills. But the principal charm of the scene was thrown upon the broad slope of Laurel Hill. Its wild, luxuriant foliage, rising romantically from a murmuring streamlet that winded along its foot, to an elevation which seemed to minele with the pure azure above, now presented to the full face of the sun all the variegated tints of the rainbow, and seemingly gloried in the triumph of its parting smiles, while all below was wrapt in comparative darkness. It appeared as if nature unfolded her brightest charms on this occasion, to hallow some be-

nignant purpose. A contemplative person might behold a scene from this eminence which would almost transport his feelings beyond the nardeserving the candid and servous attention of row confines of this world. He would view those who are friendly to the rules of deco- in the little village below him, and in the rum and propriety, as well as the sensitive surrounding woodlands and lawns, an elvsifeelings of those who, by the common con- um of domestic and rural felicity, scarcely sent of the virtuous and intelligent portion of to be found on any other part of the earth. our sex, are at all times, and in all places, His heart would exclaim with the poet-

Page 144. "Childhood" constitutes the third sketch in the book, and although a subject so trite, it seems to have been long since exhausted, it has here afforded the writer an opportu nity of indulging in some of those melanchoy, yet pleasing and not unprofitable reflections, which, at times, melt the heart of the most thoughtless, and will be read with pewith such becoming mildness and forbearance | culiar pleasure by those especially who love to dwell on " days and years that have gone. never to return." The tear will then flow for neglected worth, but no tears, no sorrow can recall the dead .-Affection can then only live in memory."

"You speak as you ought," said I, "and I doubt not you feel the subject of your remarks."

"I do," he replied, "but who can de scribe, in an adequate manner, the feelings which a recollection of natural fondness awakens. To the orphan-the motherless-the thoughts of childhood are doubly dear. Who but one that has lost a mother, can tell how dear her early blessings are in the record of memory? We take a melancholy delight in looking upon a mother's grave. It is there I love to pour out the sorrows of my soul. I often visit the hallowed spot-I have often knelt upon it-I have kissed it with a fondness savouring of enthusiasm." " Sketch, No. 9," is on letter-writing,

which the writer enters upon the inquiry, why the cold formality of worldly custom should interpose a barrier against epistolary correspondence between those of opposite sexes, and asks, is it not a mistaken opinion -an over-refined delicacy, on the subject of female rectitude? The following observations are just and pertinent, and certainly place the affirmative of the question in no unfavourable light.

It is generally admitted, that young men derive more refinement, grace, softness, tenderness of feeling, and polish of manners, in good female society, than in their own-and that, on the other hand, females, in judgment and understanding, are improved more in the company of men than among their own sex. This proceeds in a great measure from a natural inclination of the sexes to appear amiable and pleasing in each other's sight-and consequently, from that scrupulous regard to propriety and decorum towards each other, which is never so sensibly felt among one's own sex.

Hannah Moore, that amiable and distinguished writer, says, "Is either sex so abounding in perfection as to be independent of the other for improvement? Have men no need to have their rough angles filed off, and their harshnesses and asperities smoothed and polished by assimilating with beings of more softness and refinement? Are the ideas of worken naturally so very judicious, are their principles so invincibly firm, are their views o perfectly correct, are their judgments so completely exact, that there is occasion for no additional weight, no superadded strength, no increased clearness, none of that enlargement of mind, none of that additional invigoration which may be derived from the aids of the stronger sex?"

If the sexes are more improved in conversation and manners in each other's society, how much higher and more beneficial may the degree of improvement be extended in conversation upon paper, on religion, morals, literature, and a thousand other interesting subjects, where their ideas may be given in a manner combining the powers of reflection with an elegance and ease of expression.

Females are generally very fluent, and sometimes eloquent in conversation, but I mean no disrespect to the sex when I say, comparatively, very few of them can express their ideas well on paper. It is not from a deficiency of natural capacity-they have ideas; but it is the want of exercising those ideas in that particular manner. No kind of composition is more easy, and at the same time better suited to the female mind, than letter-writing. It is a species of composition which does not require much study or labour, nor must it be careless or slovenly. As Blair observes, "it possesses a kind of middle place between the serious and amusing."

In a letter we look for the heart more than the head; for the feelings and affections, more than the elegant learning of the author. The more ease and familiarity, and the less study or laboured ornament we find in a letter, the better we are pleased with it. It is, as the author last quoted emphatically says, "a conversation carried on upon paper," and the nearer it assimilates to the common language of the heart, the more forc bly does it strike upon our own feelings. Page 95.

As we have already exceeded our limits, we shall defer the conclusion of our extracts, together with some further remarks, until next week.

Elliott's Hair Restorative.

THAT the preservation of that invaluable and highly ornamental coverag—the Hair, should be desirable, these can be no doubt. But, in the event of its loss, through sickness or other causes, to be enabled to renovate its growth, should be a consideration of no less importance. Such is the established efficacy of Elijott's Hair Restorative, upon the capillary system, that a very few applications of it (even in cause of hereditary baldness) will be productive of a covering of young hair, resembling the fine capillaments perceivable in the centre of a flowing growing up within a plant, which, by attention in its use, will rapidly advance to healthy maturity. Its emothems, ecoling, gently stimulating and delicately aromatic properties, renders Elijott's Hair Resto ative a superior, clipillary vegetally lotion. Its effects, as experienced by many subject to nervous diseases of the head, such as feverish heat, head-ache, &c. (which in many instance causes the hair to fall off in cleaves from the tree in autumn particularly in scarm weather) warrants its recommendation to awareness as a most benight cephalic. It also cradicals from the membrane, the Scruf or Dundruff, which so frequently secumulates around the oots and ultimately destroys the hair, and, by its cephalic influence upon the capillary vessels, it all cases of renewed growth, the hear will be healthy and thick, and acquire additional lustre. It may be safely, and with good effect, appried to the heads of infants, or children whuse hair may spirit

TO DOROTHY PRIM & CO. Ah! say, can dreams the soul beguile Or give to fortune's changing smile, The power, prophetic light to shed, In settled sunshine o'er my head? Or ever must those visions wild, Delusion bring to Folly's child; And reason all her powers employ, To blast the hope of future joy

The moon had sunk her in the main. And night's dark wing o'er hill and plain Held silent government, to keep All nature in profoundest sleep, While Morpheus with a silver wand, Portrayed the scenes of fairy-land.

To Southward, o'er the snowy lawn, In haste, I flew at early dawn; While full in view before me play, The leaders of my erring way; Yet all unknown the destined port, That seat of bliss, our glad resort; Alike unknown the appointed hour That les us to your pleasant bower: The devious path was drear and lone, Till o'er its course your crescent shone, And one bright beam auspicious threw, Which lives in memory of you.

Again, amidst the blooms of spring soar'd on fancy's gilded'wing, Where dipt in nature's loveliest dye, The flowers of promise greet the eye, And Hope sent forth her cheering light. Like moon-beams o'er the vault of night But soon the flowers bestrewed the vale, Their odours died upon the gale, And sunk in night's unconscious power, The visions of the fleeting hour.

But last, -when summer's latest breeze Gave sober sadness power to please. And all around-the landscape o'er, Was crowned in autumn's richest store : I saw your smiling bands appear, And each-(oh, might I name them here.) Held, shining forth in full display, The splendid trophies of the day, Not flowers alone in phalanx fair, The heavenly virtues mingled there, And from the van concent'ring fell Such influence as I may not tell .-Such tidings came, as Adam's ear In Eden's bower was wont to hear: Hail! then, all hail! the coming date, When time shall realize our fat OLIVER WHIM. 3d Mo. 1st, 1825.

ENIGMA.-What is that which was produced by nature soon after the creation, and is at once her enemy and benefactor; possessed of such invincible resolution, that though we daily overcome, and for a while destroy it, yet it constantly attacks us with as much fury as ever, and its power is so great, as to become a common proverb.

SCRAPS.

A London paper notices the breaking down of Alderman Wood's carriage, the axletree of which was badly fractured; but the Wood within was unhurt.

A young lady going into a barrack room at Fort George, saw an officer toasting a slice of bread on the point of his sword; on which she exclaimed, "I think, sir, you have got the staff of life on the point of death."

Why did you not admire my daughter?"said the late lady Archer to a gentleman-"Because," said he, "I am actually no judge of painting." "But surely," rejoined her ladyship, not in the least disconcerted, " you never saw an angel that was not painted."

A Hint .- A capitalist being asked what he thought of the innumerable new speculations now afloat, replied - "They are like a cold bath; to derive any benefit from which, it is necessary to be very quick in and very soon

Dandeloin .- This plant makes a pleasant salad in the spring, while the leaves are hardly unfolded. It is much used by the French who eat it with bread and butter. It may be blanched by culture. Parsley .- If after having bruised some

sprigs of parsley in your hands, you attempt to rinse glasses, they will snap or suddenly break.

Whooping-Cough.- A plaster of gum gal banum, applied to the chest, cures this complaint.

When the Opera House at Stockholm was on fire, the life of the King, who was present. was saved by the presence of mind of Madame Kayser, an actress. Already the machinery at the end of the stage was in flames, without the audience knowing of it, when Madame Kayser gradually approached the royal box without interrupting her singing or action .-At first she made signs to the King, who did not understand her; she then, seizing a favorable moment, said to him in a low voice, "Leave the Theatre, Sire, it is on fire."-The King instantly quitted the house; when, after giving him time to escape the crowd, she vociferated 'Fire!' and gaining her box threw herself out of a window, which not being very high from the ground, she escaped uninjured.

ST. PAUL'S.—In digging the foundation for rebuilding this cathedral it was discovered, beneath the graves, that the foundation of the old church rested on a layer of hard and close pot earth. Curiosity led Sir Christo-pher Wren to search further. He found, that on the north side it was six feet thick, that it grew thinner towards the south, and on the decline of the hill was scarcely four. On advancing further, he met with nothing but loose sand; at length he came to water and sand mixed with periwinkle and other sea shells: and by boring, came at last to the beach, and under that the natural hard clay, which evinced that the sea had once occupied the space on which St. Paul's now stands. It was the opinion of our great architect, that, all the space between Camberwell hill, and the hills of Essex, had been a vast bay, at low water a sandy plain.

A CURIOSITY.

MR. GIBBS. Lottery B oker, of this city, has been recently exhibiting in this state a curious piece mechanism. said to be the work of an Italian artist. I consists of a box 8 1-2 inches long, 2 1-2 wide, and 1 1-4 deep—of fine gold. On one end is a snuff box—on the other, a lid opens and discloses an eight day time piece, which, besides striking the hours and quarters, plays a number of beautiful tunes. But the most wonderful part is, that on setting a spring, a picture on the top of the box rises slowly, and discovers a bird ascending from below. The bird is about an inch in length; of plum-age the most rich, and yet the most natural. It sings with astonishing sweetness, and accompanies its voice with all those motions common to a living bird—its head turns from side to side—its little bill opens and its throat swells at every note, and its wings and tail spread and contract during its song. After finishing and repeating its strain, it drops upon its golden nest, destends to its retreat, and the lid gently closes to its place. may 21—tf

DYSPEPSIA.

DR. MEAD'S PILLS have been proved by that infallible test of truth, experience, the most effectual medicine ever offered in any country, for the cure of all those deranged states of the digestive organs, denominated Dyspepsia or Indigestion, which frequently makes its appearance in the most complicated forms, such as loss of appetite, sickness at the stomach, and sometimes vomiting; beking up of water, which is sometimes tasteless, but most commonly sour; gnawing pain in the stomach, heartmonly sour; gnawing pain in the stomach, heart burn, costiveness, pateness of the countenance, Indi-guor, lowness of the spirits palpitation of the heart, vertigo, and disturbed sleep. The number of these symptoms varies in different patients, by some being felt only in parts, while others have additional ones, equally disagreeable, such as severe pains in the head and breast, flatulence, emaciation, or wasting of the and breast, flatulence, emaciation, or wasting of the whole body, with great weakness, particularly of the legs. These pills will most effectually remove all sourness of the stomach, not merely by neutralizing the acid, but by correcting that morbid state of the secretions which give rise to it; and at the same time will restore to the debilitated organs of digestion, that tone and vigour which is absolutely necessary to the well-being of the animal economy. The best proof of their efficacy is, that they are prescrib-ed by many of the first physicians, and used by the most intelligent families throughout the union. Sold by THATCHER & THOMPSON.

and by SMITH & PEARSALL, Market street, Philadelphin; WILLIAM BUTLER, Market street, Baltimore; and by most of the Druggists throughout the Union. Price 81 per box. ap 23-3m

TO THE AFFLICTED.

THE Subscribers being persuaded that the merits of Dr. SMITH, No. 86 North Fifth street, Philadelphia, who has introduced the Indian system of Medicine and Healing, cannot be too generally known, and feeling that gratitude which it is natural to feel to Providence, and towards a man who, under His assistance, has raised them from infirinity and wretchedness, to health and comfort; and from a hope of render-ing a service to such of their fellow citizens as may be smitten with disease and pain, have de-termined to make known their individual a res. To Dr. SMITH, the Indian Physician, No 86 North Fifth street.

Philadelphia, October 26th, 1824. Sta-Permit me thus publicly to thank you for an almost miraculous cure I have received through your assistance; and to declare to my fellow citizens that I had been for eight years, or upwards, afflicted with an ulcerated sore leg, attended with the most troublesome burning and itching, so as speak much above a whisper. At that its to render me incapable of enjoying life as I could called on Dr. Smith, who undertook my conwish, and, in a great degree, deprived me of in about four or five weeks restored me to held ability to attend to my occupation. I therefore and to a prospect of enjoying my life in applied to two eminent physicians in this city, one of whom commenced his operations, but without success; the other pronounced me incurable, which was truly discouraging to me, so much so that I was almost persuaded to think that I never could be cured; until, happily for me, I was ad- skill. vised to apply to you. I did so; the result of which application has proved, to my great satisfaction, that an ulcer confirmed for many years, could be effectually cured in the short space of eight or nine weeks, after having been given up is incurable by men of skill. I can now walk without pain and have done so for these five months past; and I famly believe that a sound and thorough cure has been effected, to my great oy and satisfaction, which shall be gratefully rememhered by your sincere friend and well-wisher, VALENTINE APPLE.

From a solemn sense of duty I. William Tean. ny, do certify, that fr m extreme debility, arising rom a severe and long continued attack of diaraioea and hoemorrhag, of at least twelve months standing, and having, at the same time, the fever and ague, I was reduced so low as to be incapable of working at my trade, (a house carpenter,) and was wasted to a skeleton, though I had the best medical advice I could obtain. When all hope had deserted me, I was informed that Dr. Snuth, n his Indian practice of Medicine, had performed many astonishing cures; as the last chance for my life, I applied to him, and through the goodness of God he has effectually cured me; and for three months last past, I have enjoyed as good realth as ever I did in my life. I wi lingly add my testimony of his ability to cure the maladies hat human nature is liable to, and have confilence in his medical skill to recommend those

suffering to his care, having no doubt but that they will obtain relief. WILLIAM TEANEY. Lives at the sign of the Volunteer, Ridge Road. worn to before me, and acknowledged this 1st day of November, 1824. S. Badger, Ald.

I certify that, for a year past, I have been afloted with an ulcerated sore leg, attended with a burning and itching sensation, which made me niserable, preventin, me from enjoying my natural rest, and in a great degree rendering me incapable of attending to my business. Having heard of Dr. Smith's mode of practice, I applied o him for assistance, and I am happy to state that think he has made a thorough cure, as I have, for some time past, suffered no pain, nor is there any symptoms of a relapse. I thus publicly ten-der him my thanks, and feel confident that I can recommend all sufferers to his skill and humanity, who are a icted with the same malady.

Any further information will be obtained by calling at my residence, or at my shop, in Fourth above Noble street.

JOHN POINT,
Pump Maker, No. 3 Richardson's Court.

I certify that for eight years last past, I have been suffering from an ulcerated sore leg, which, at times, was partially healed, but would break out again with greater virulence than before, and I could perceive no improvement in the appearance of the ulcer, but that it evidently grew worse, attended with great pain and swelling. After all my endeavours to get it cured, and being almost in despair of getting relief, fortunately for me, I heard of the cure that Dr. Smith had effected in heard of the cure that Dr. Smith had effected in the case of Mr. Apple ; upon which I immediatev applied to him for medica aid, and I now have the satisfaction to state publicly, that I consider myself perfectly cured, without even a sear, and can confidently recommend to the skill of Dr. Smith, all such as are suffering from ulcerous complaints. Any information respecting my case, will be freely given to the enquirer, by applying at No. 50 Cherry st. to ADAM HAMPTON.

Sworn to before me, this 2d Nov. 1824, S. BADGER, Ald.

I certify that I had been, for a long time, laouring under a scrofulous complaint, and an ulerated sore throat, from which I suffered severe-, and at the same time, was afflicted with a toter which covered my whole body, which, in a great me-sure deprived me of strength to follow my trade, and I had, during that time, the attenfance and advice of medical men, without any risible benefit, but rather grew worse, and my case wa so bad that I despaired of ever being eured-till, fortunately for me, I heard of Dr Smith's skill, as a physician and upon my applying to him, was taken u der his care, and, to my surprise and great satisfaction, was perfectly cured n the short space of four weeks. I am now in perfect health, and there is not the slightest perception of the return of my old complaint. I therefore thus publicly express my gratitude to him, as being, through the blessing of God, the cause of my perfect restoration to health, and the enjoyment of life, of which I had, at one time, given up all hope, nd recommend to his skill, all those who are suffering with the same com lants

from which he has so happily relieved me. M'KINNEY PORTER Cherry street, near Ninth. Witness, WILLIAM WILSON.

This is to certify, that I was afflicted, for more than six years previous to my leaving England, with a pain in my back and left side, accompanied with a very bad cough, so that I could not lie in bed for three mouths, and during my indisposition. I was reduced to much debit to of body. In this extreme ill health, I was induced to apply to at least thirty respectable Physicians, from many of whom I received assurance, that I could not survive the disordered state of my body; but leaving England, I came to America, hoping the vovage would be of service to me, but this also failed. I. however, finally heard of Doetor Smith and on application to him, I received a phial of his Pulmonary Balsam, which perfectly cured me in a few days, and I have been as well as ever I was in my life, ever since, to my great joy and satisfaction.

No. 4 Little York street, Baltimore. Sworn and subscribed before me, 8th Dec. 1820. M D. Tilden.

This is to certify, that for five years last past, I have been afflicted with the Asthma, and a coughs ometimes to a distressing decree, at other time, I enjoyed, comparatively, a good state of healthbut I was never entirely cured of my complaint I had ried numerous remedies, and have had mue medical attendance, but without effecting a cure. About 6 months since, I had a violent attack of the Asthms, which affected me so powerfully, that for twenty-four days and nights in succession I could not lie down in my bed, but was obliged to sit in a chair in a reclining po ture, and it was attended with such a laborious breathing that life was a burthen to me. In this state, with little hope of ever again recovering my health, I applied to Dr. Smith wishing to obtain some relief from suffering:-he gave, me some of his Pulmonary Balsam, and in the space of twenty-four ho ra time I was sensibly relieved—and by continuing the medicine for a few days I was restored to perfect health, which I have now enjoyed for about five months. In order that the medicine may be more generally known, and fo the information of those suffering f om Asthma, I give this public testimony of his skill in that complaint.

SWAIM'S PANACEA

I'MIS valuable Medicine has obtained a distinction which its efficacy alone can support. As a purious the blood it has no parallel. It is the most used pring and autumn afterative ever known. All the who are affected with Scrofula, Leproy, Scary, or any of those gulanous to the street of the series of the ser who are affected with scrofula, Leprsay, scary, cutaneous Eruptions, or any of those melancholy deseas arising from impurity of the blood and julerathose who suffer by diseased Liver, Rheumate attions, or from indiscretion of their youth or the whose constitutions are broken down by mercurial, a monial, or arsenical medicines, should submit to a cour of Swaim's Panacea. The effect of this Medicine mach as now to interrupt in the plantess or how to interrupt in the plantess of t of Swaim's Panacea. The effect of this Medicine is such as not to interrupt either business or pleaser, as requires only the common restraints of moderation idet. It is conveyed by the circulating fluids, and corects their tendencies to all those diseases which one nate in vitiated blood. It is a safe, though a pueue substitute for mercury, and removes those evils which an unsuccessful use of that mineral so often occasion.

In all complicated cases of Scrofula and Syphilis, here the Syphilitic Virus of the parent causes a lopment of Scrofula in the child, th's is the only nedy upon which a single hope of recovery can be onably founded; there has been no instance of its ture, when properly used. It imparts vigour to which under the common modes of practice, is not which under the common modes of practice, is usually withheld from the influence. In many instances when the horrible ravages of ulceration had laid have lignent and hone, and where, to all appearance, no human earns but amputation could have saved life; in one extreme as even here described, have parients less snatched from the grave and restored to good health, and the devouring disease completely eradicated. To and the devouring disease completely eradicated. The discovery of a remedy like this now offered for sale habeen a desideratum from time immemorial.

The Proprietor does not suppose his bare asserting

will convince: he will therefore give references to ad as have been cured, and those under his care, amore whom are many highly respectable citizens, that she satisfy the most incredulous of its superior efficacy is the disorders for which it is here recommended. Emmember of society should aid in diffusing information of this discovery—humanity alone makes if a daty.
